## **T**est-taking Strategies for the IMA

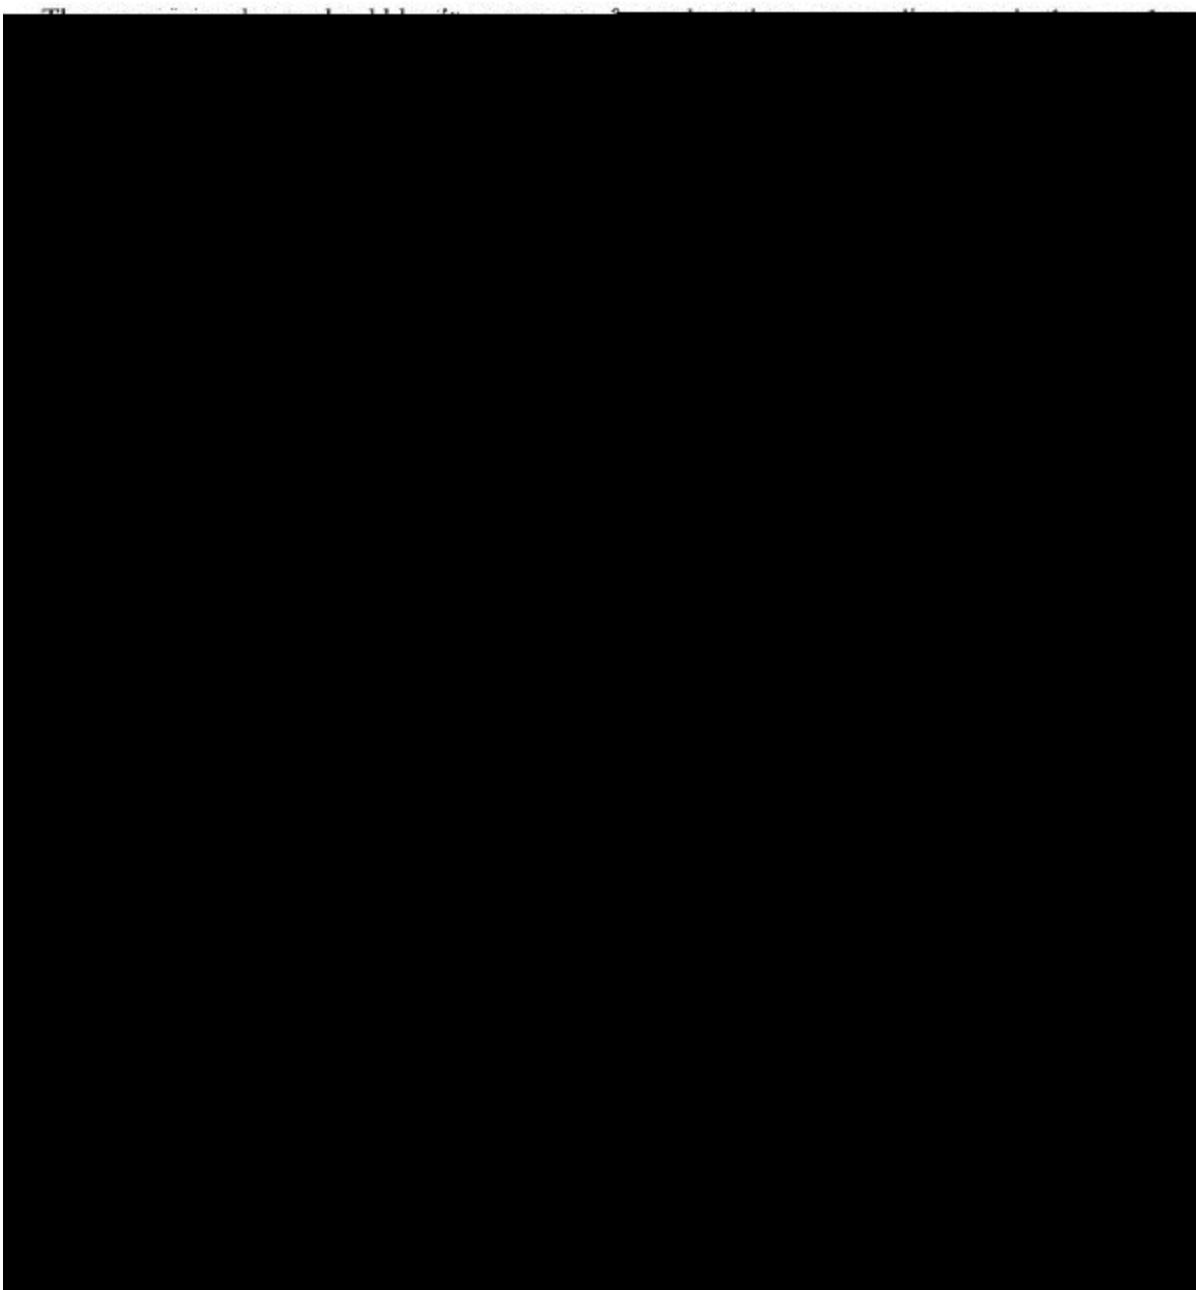

### **Read All the Answer Options**

but a better... and not 'satisfy' the first answer you come to that seems to make sense. It may seem to be the right answer... but it may also be listed. If need be, then, yet again looking to the other options.

### **Goodbye! About Questions for Models**

Even analogies don't always work in this way, so don't think for a different meaning for one or two words. You might find many two instances in the analogy question which are not alike. However, the analogy makes no sense if you read from option A or B meaning the same. However, a NAPOLYON is also a country. One who has an INFLUENCE is made of NAPOLYON... so, you can see what's wrong is made by a warning that

## **Check the Part of Speech**

## **Answer Every Question**

**Answer every question.** Your score is based on the number of correct answers you give. The computer's answer is given with a human-like voice. You can say "I don't know" or "I'm not sure" without being scored as a wrong answer. If you guess a straight guess An item to which you do not respond will be scored at least you have a one-in-four chance of getting the item right.
